

MI - VERTICAL AUTOMOTIVE CLAMPS WITH STRAIGHT BASE

These straight base series clamps are supplied in separate parts includes handle, silicon handle grip and clamping bar, which allows the designer to identify the suitable position and weld them to suit the application. These models feature with the straight base for situation where a vertical surface is used to mount the clamp, which can be directly bolt mounted or welded to a fixture. These series clamp have more height under the clamping bar. Clamping bar allows wide opening angle which enables easy loading and unloading of the workpiece. All MI clamps comes with an unique silicon rubber grip which is only manufactured by MI which withstands high temperatures at work place. These clamps are finished black oxide.
